Refrigerator
user manual

imagine the possibilities

Thank you for purchasing this Samsung product.

Free Standing Appliance
Safety information

SAFETY INFORMATION

• Before operating the appliance, please read this manual thoroughly and retain it for your reference.

• Use this appliance only for its intended purpose as described in this instruction manual. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

• This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

• Warnings and Important Safety Instructions in this manual do not cover all
possible conditions and situations that may occur. It is your responsibility to use common sense, caution, and care when installing, maintaining, and operating your appliance.

- Because these following operating instructions cover various models, the characteristics of your refrigerator may differ slightly from those described in this manual. And not all warning signs may be applicable. If you have any questions or concerns, contact your nearest service center or find help and information online at www.samsung.com.

- It is hazardous for anyone other than an Authorized Service Person to service this appliance. In Queensland – the authorized Service Person MUST hold a Gas Work Authorisation or Licence for hydrocarbon refrigerants, to carry out Servicing or repairs which involve the removal of covers. (For Australia only)

---

**Important safety symbols and precautions:**

- **WARNING** Hazards or unsafe practices that may result in severe personal injury or death.

- **CAUTION** Hazards or unsafe practices that may result in minor personal injury or property damage.

- Do NOT attempt.

- Do NOT disassemble.

- Do NOT touch.

- Follow directions carefully.

- Unplug the power plug from the wall socket.

- Make sure the machine is grounded to prevent electric shock.

- Call the contact center for help.

- Note.
These warning signs are here to prevent injury to you and others. Please follow them explicitly. After reading this section, keep it in a safe place for future reference.

SEVERE WARNING SIGNS FOR TRANSPORTATION AND SITE

• When transporting and installing the appliance, care should be taken to ensure that no parts of the refrigerating circuit are damaged.

• R-600a or R-134a is used as a refrigerant. Check the compressor label on the rear of the appliance or the rating label inside the refrigerator to see which refrigerant is used for your refrigerator.

• When this product contains flammable gas (Refrigerant R-600a), contact your local authority in regard to safe disposal of this product.

- When transporting and installing the appliance, care should be taken to ensure that no parts of the refrigerating circuit are damaged.

SEVERE WARNING SIGNS FOR INSTALLATION

• Do not install this appliance in a humid, oily or dusty location, in a location exposed to direct sunlight and water (rain drops).

• Deteriorated insulation of electrical parts may cause an electric shock or fire.

• Do not install this appliance near a heater, inflammable material.

• Do not plug several appliances into the same multiple power board. The refrigerator should always be plugged into its own individual electrical outlet which has a voltage rating that matched the rating plate.
This provides the best performance and also prevents overloading house wiring circuits, which could cause a fire hazard from overheated wires.

- There is a risk of electric shock or fire.

- Do not use a cord that shows cracks or abrasion damage along its length or at either end.

- Do not pull or excessively bend the power cord.

- Do not twist or tie the power cord.

- Do not hook the power cord over a metal object, place a heavy object on the power cord, insert the power cord between objects, or push the power cord into the space behind the appliance.

- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.

- Do not install this appliance in a location where gas may leak.

- This may result in an electric shock or fire.

- Failing to do so may result in an electric shock, fire, explosion, problems with the product, or injury.

- This refrigerator must be properly installed and located in accordance with the manual before it is used.

- Do not install the refrigerator in a damp place or place where it may come in contact with water.

- Deteriorated insulation of electrical parts may cause an electric shock or fire.

- Connect the power plug in proper position with the cord hanging down.

- If you connect the power plug upside down, wire can get cut off and a cause fire or an electric shock.

- Do not use a cord that shows cracks or abrasion damage along its length or at either end.

- Make sure that the power plug is not squashed or damaged by the back of the refrigerator.

- The installation or any service of this appliance is recommended by a qualified technician or service company.
• When moving the refrigerator, be careful not to roll over or damage the power cord.
  - This may result in an electric shock or fire.
• This appliance should be positioned in such a way that it is accessible to the power plug.
  - Failing to do so may result in an electric shock or fire due to electric leakage.
• Keep the packing materials out of reach of children.
  - There is a risk of death from suffocation if children put them on their head.

⚠️ • This appliance must be properly grounded.
• Do not ground the appliance to a gas pipe, plastic water pipe, or telephone line.
  - You must ground the refrigerator to prevent any power leakages or electric shocks caused by current leakage from the refrigerator.
  - This may result in an electric shock, fire, explosion, or problems with the product.
• Never plug the power cord into a socket that is not grounded correctly and make sure that it is in accordance with local and national codes.

⚠️ • If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
• The fuse on refrigerator must be changed by a qualified technician or service company.
  - Failing to do so may result in electric shock or personal injury.

CAUTION SIGNS FOR INSTALLATION

⚠️ • Keep ventilation opening in the appliance enclosure or mounting structure clear of obstruction.
• Allow the appliance to stand for 2 hours before loading foods after installation and turning on.
SEVERE WARNING SIGNS FOR USING

- Do not touch the power plug with wet hands.
  - This may result in an electric shock.
- Do not store articles on the top of the appliance.
  - When you open or close the door, the articles may fall and cause a personal injury and/or material damage.
- Do not put items filled with water on the refrigerator.
  - If spilled, there is a risk of fire or electric shock.
- Do not let children hang on the door.
  - Risk of children entrapment.
  - Do not let children enter inside the refrigerator.
- Do not leave the doors of the refrigerator open while the refrigerator is unattended and do not let children enter inside the refrigerator.
- Do not allow babies or children go inside the drawer.
  - It can cause death from suffocation by entrapment or personal injury.
- Do not sit on the Freezer door.
  - The door may be broken and cause a personal injury.
- To prevent children entrapment, you must reinstall the divider using provided screws after cleaning or other actions if you removed the divider from the drawer.
- Never put fingers or other objects into the dispenser hole, ice chute and ice maker bucket.
  - It may cause a personal injury or material damage.
  - Failure to do so may cause personal injury or material damage.
- Do not store volatile or flammable substances such as benzene, thinner, alcohol, ether or LP gas in the refrigerator.
  - The storage of any of such products may cause an explosion.
- Do not store low temperature-sensitive pharmaceutical products, scientific materials or other low temperature-sensitive products in the refrigerator.
- Products that require strict temperature controls must not be stored in the refrigerator.
  • Do not place or use electrical appliance inside the refrigerator, unless they are of a type recommended by the manufacturer.
  • Do not use a hair dryer to dry the inside of the refrigerator. Do not place a lighted candle in the refrigerator for removing bad odors.
  - This may result in an electric shock or fire.
  • Do not touch the inside walls of the freezer or products stored in the freezer with wet hands.
  - This may cause frostbite.
  • Do not use me chanical devices or any other means to accelerate the defrosting process, other than those recommended by the manufacturer.
  • Do not damage the refrigerant circuit.

🌟 • This product is intended only for the storage of food in a domestic environment.

- Bottles should be stored tightly together so that they do not fall out.
- In the event of a gas leak (such as propane gas, LP gas, etc.), ventilate immediately without touching the power plug.
  Do not touch the appliance or power cord.
- Do not use a ventilating fan.
- A spark may result in an explosion or fire.
  • Use only the LED Lamps provided by manufacturer or service agent.
  • Children should be supervised to ensure that they do not play with the appliance.
  - Keep fingers out of “pinch point” areas; clearances between the doors and cabinet are necessarily small. Be careful when you open the doors when children are in the area.
  • Do not let children hang on the door.
    If not, a serious injury may occur.
  • Risk of children entrapment.
    Do not let children enter inside the refrigerator.
• Do not attempt to repair, disassemble, or modify the appliance yourself.
  - Do not use any fuse (such as cooper, steel wire, etc.) other than the standard fuse.
  - When repairing or reinstalling the appliance is required, contact your nearest service center.
  - Failing to do so may result in an electric shock, fire, problems with the product, or injury.

• If the appliance generates a strange noise, a burning or smell or smoke, unplug the power plug immediately and contact your nearest service center.
  - Failing to do so may result in an electric or fire hazards.
  - Pull the power plug out of the socket before changing the interior lamps of the refrigerator
  - Otherwise, there is a risk of electric shock.
  - If you experience difficulty when changing the light, contact service agent.

• If the products is equipped with the LED Lamp, do not disassemble the Lamp Cover and LED Lamp by yourself.
  - Please contact your service agent.
• If any dust or water is in the refrigerator, pull out power plug and contact your Samsung Electronics service center.
  - There is a risk of fire.
  - Plug the power plug into the wall socket firmly.
  - Do not use a damaged power plug, damaged power cord or loose wall socket.
  - This may result in an electric shock or fire.
• Do not stand on top of the appliance or place objects (such as laundry, lighted candles, lighted cigarettes, dishes, chemicals, metal objects, etc.) on the appliance.
  - This may result in an electric shock, fire, problems with the product, or injury.
• Do not put a container filled with water on the appliance.
  - If spilled, there is a risk of fire or electric shock.
• Never stare directly at the UV LED lamp for long periods of time.
  - This may result in eye strain due to the ultraviolet rays.

CAUTION SIGNS FOR USING

🌟 • To get best performance from the product,
  - Do not place foods too closely in front of the vents at the rear of the appliance as it can obstruct free air circulation in the refrigerator compartment.
  - Wrap the food up properly or place it in airtight containers before putting it into the refrigerator.
  - Do not put any newly introduced food for freezing near to already existing food.
• Do not place carbonated or fizzy drinks in the freezer compartment.
  Do not put bottles or glass containers in the freezer.
  - When the contents freeze, the glass may break and cause personal injury and property damage.
• Do not change or modify the functionality of the refrigerator.
  - Changes or modifications may result in a personal injury and/or property damage.
  Any changes or modifications performed by a 3rd party on this completed appliance are neither covered under Samsung warranty service, nor is Samsung responsible for safety issues and damages that result from 3rd party modifications.
• Do not block air holes.
  - If the air holes are blocked, especially with a plastic bag, the refrigerator can be over cooled.
  If this cooling period lasts too long, the water filter may break and cause water leakage.
• Please observe maximum storage times and expiry dates of frozen goods.
• Fill the water tank, ice tray, water cubes only with potable water.
• Use only the ice-maker provided with the refrigerator.
• The water supply to this
refrigerator must only be connected to a potable water supply only.

- In order to operate the ice-maker properly, water pressure of 138 ~ 862 kPa (1.4 ~ 8.8 kgf/cm³) is required.
- If you have a long vacation or business trip and won’t use water or ice dispensers, close the water valve.
  - Otherwise, water leakage may occur.
- Wipe excess moisture from the inside and leave the doors open.
  - Otherwise, odor and mold may develop.
- Do not spray volatile material such as insecticide onto the surface of the appliance.
  - As well as being harmful to humans, it may also result in an electric shock, fire or problems with the product.
- Do not apply strong shock or excessive force onto the surface of glass.
  - Broken glass may result in a personal injury and/or property damage.

CAUTION SIGNS
FOR CLEANING AND MAINTENANCE

- Do not clean the appliance by spraying water directly onto it.
- Do not use benzene, thinner or alcohol to clean the appliance.
  - This may result in discoloration, deformation, damage, electric shock or fire.
- Do not use or place any substances sensitive to temperature such as inflammable sprays, inflammable objects, dry ice, medicine, or chemicals near the refrigerator.
  - Do not keep volatile or inflammable objects or substances (benzene, thinner, propane gas, etc.) in the refrigerator.
  - This refrigerator is for storing food only.
  - This may result in a fire or an explosion.
- Do not spray cleaning products directly on the display.
  - Printed letters on the display...
may come off.
• If any foreign substance such as water has entered the appliance, unplug the power plug and contact your nearest service center.
  - Failing to do so may result in an electric shock or fire.
• Remove all foreign substances such as dust or water from the power plug terminals and contact points using a dry cloth on a regular basis.
  - Unplug the power plug and clean it with a dry cloth.
  - Failing to do so may result in an electric shock or fire.
• Never put fingers or other objects into the dispenser hole and ice chute.
  - It may cause a personal injury or material damage.

⚠ ⚠ Before cleaning or performing maintenance, unplug the appliance from the wall socket.
  - Failing to do so may result in an electric shock or fire.

⚠ ⚠ SEVERE WARNING SIGNS FOR DISPOSAL

• Ensure that none of the pipes on the back of the appliance are damaged prior to disposal.
• R-600a or R-134a is used as a refrigerant. Check the compressor label on the rear of the appliance or the rating label inside the refrigerator to see which refrigerant is used for your refrigerator. When this product contains flammable gas (Refrigerant R-600a), contact your local authority in regard to safe disposal of this product. Cyclopentane is used as an insulation blowing gas. The gases in insulation material require special disposal procedure. Please contact your local authorities in regard to the environmentally safe disposal of this product. Ensure that none of the pipes on the back of the appliances are damaged prior to disposal. The pipes shall be broken in
the open space.

- When disposing of this or other refrigerator/s, remove the door/door seals, door latch so that children or animals cannot become trapped inside. Leave the shelves in place so that children may not easily climb inside.
- Children should be supervised to ensure that they do not enter and play with the appliance.
  - If trapped inside, the child may become injury and suffocate to death.
- Please dispose of the packaging material for this product in an environmentally friendly manner.

**ADDITIONAL TIPS FOR PROPER USAGE**

- In the event of a power failure, call the local office of your Electricity Company and ask how long it is going to last.
  - Most power failures that are corrected within an hour or two will not affect your refrigerator temperatures. However, you should minimize the number of door openings while the power is off.
  - Should the power failure last more than 24 hours, remove all frozen food.
- The appliance might not operate consistently (possibility of temperature becoming too warm in the refrigerator) when sited for an extended period of time below the cold end of the range of temperature for which the refrigerating appliance is designed.
- In case of particular foods, keeping it under refrigeration can have a bad effect on preservation due to its properties.
• Your appliance is frost free, which means there is no need to manually defrost your appliance, as this will be carried out automatically.

• Temperature rise during defrosting can comply with ISO requirements. But if you want to prevent an undue rise in the temperature of the frozen food while defrosting the appliance, please wrap the frozen food up in several layers of newspaper.

Saving Energy Tips

- Install the appliance in a cool, dry room with adequate ventilation. Ensure that it is not exposed to direct sunlight and never put it near a direct source of heat (radiator, for example).

- Not to block any vents and grilles is recommended for energy efficiency.

- Allow warm food to cool down before placing it in the appliance.

- Put frozen food in the refrigerator to thaw. You can then use the low temperatures of the frozen products to cool food in the refrigerator.

- Do not keep the door of the appliance open for too long when putting food in or taking food out. The shorter time for which the door is open, the less ice will form in the freezer.

- Clean the rear of the refrigerator regularly. Dust increases energy consumption.

- Do not set temperature colder than necessary.
- Ensure sufficient air exhaust at the refrigerator base and at the back wall of the refrigerator. Do not cover air vent openings.
- It is recommended to install the refrigerator with clearance to the back and sides. This will help reduce power consumption and keep your energy bills lower.
- For the most efficient use of energy, please keep the all inner fittings such as baskets, drawers, shelves on the position supplied by manufacturer.

This appliance is intended to be used in household and similar applications such as:

- staff kitchen areas in shops, offices and other working environments;
- farm houses and by clients in hotels, motels and other residential type environments;
- bed and breakfast type environments;
- catering and similar non-retail applications.
GETTING READY TO INSTALL THE REFRIGERATOR

Congratulations on your purchase of this Samsung French Door Refrigerator. We hope you enjoy the state-of-art features and efficiencies that this new appliance offers.

Selecting the best location for the refrigerator

Choose:

- A location with easy access to a water supply.
- A location without direct exposure to sunlight.
- A location with level (or nearly level) flooring.
- A location with enough space for the refrigerator doors to open easily.
- A location that allows sufficient space to the right, left, back, and top for air circulation. If the refrigerator does not have enough space, it can cause the bad influence to refrigeration efficiency and power consumption.
- A location that allows you to move the refrigerator easily if it needs maintenance or service.
- Do not install the refrigerator in locations where the temperature is over 110 °F (43 °C) or below 50 °F (10 °C).

• Each measurement based on the design dimension, so it may differ depending on the measuring method.
When moving your refrigerator

To prevent floor damage, be sure the front adjusting legs are in the up position (above the floor). Refer to “Leveling the Refrigerator” on page 20.

Flooring

For proper installation, you must place this refrigerator on a level, hard surface that is the same height as the rest of the floor. This surface should be strong enough to support a fully loaded refrigerator.

To protect the finish of the flooring, cut a large section of the cardboard carton and place it under the refrigerator where you are working.

When moving the refrigerator, you need to pull and push it straight forwards or back. Do not wiggle it from side to side.

CAUTION

CAUTION

Removing the refrigerator doors

For some installations, you need to remove the fridge and freezer drawers so you can move the refrigerator to its final location.

Do not remove the doors/drawer if you don’t need to.

If you do not need to remove the refrigerator doors, go to “Leveling the Refrigerator” on page 20.

If you need to remove the doors, continue below.

Before removing the door/drawer, make sure you read the following items:

- Disconnect power to the refrigerator before removing the door or drawer.

- Be careful not to drop, damage or scratch the door / drawer while removing them.

- Be careful not to injure yourself while removing the doors / drawer.

- Reattach the door/drawer properly to avoid:
  - Moisture from air leakage.
  - Uneven door alignment.
  - Wasting energy due to improper door seal.

Disassembling the refrigerator doors

Be careful not to drop and scratch the doors while removing them.

WARNING

WARNING
Required Tools (Not provided)

You need the following tools to complete the installation of your refrigerator:

<table>
<thead>
<tr>
<th>Tool</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Philips screwdriver (+)</td>
<td>Flat-blade screwdriver (-)</td>
</tr>
<tr>
<td>Flat-blade screwdriver (-)</td>
<td>Socket wrench (13/32&quot;) (10 mm)</td>
</tr>
<tr>
<td>Pliers</td>
<td>Allen wrench (3/16&quot;) (5 mm)</td>
</tr>
</tbody>
</table>

With the door opened

1. Remove 3 screws holding down the TOP TABLE (1) and separate the connected wires.

2. Disconnect two connectors (2) on the left side door. To remove the water coupler from the hinge, twist and pull it from the hinge. Remove the water line (3) while pressing the marked part (4) of the water line coupler.

3. Pull and remove the hinge lever (5). Remove the ground screw (6) attached to the upper left door hinges with a philips screwdriver (+). Remove the upper left and right door hinges (7).

4. Lift the door straight up to remove.

5. Remove the screw (8) attached to the lower left and right door hinges with a philips screwdriver (+). Remove the 2 hex head bolts (9) attached to the lower left and right door hinges with an allen wrench (3/16"). Remove the lower left and right door hinges (10).
REATTACHING THE REFRIGERATOR DOORS

To reattach the fridge doors after you have moved the fridge to its final location, assemble the parts in reverse order.

1. The Water Line must be fully inserted into the center of the transparent coupler (Type A) or the Guide Lines (Type B) to prevent water leakage from the dispenser.

DISASSEMBLE THE FREEZER DRAWER

1. Take out the upper drawer by lifting it up.

2. Remove the freeze room guard (1) by lifting the guard up.

3. Take out the lower basket (2) by lifting the basket up from the rail system.

CAUTION
You can scratch the side of the bin if you twist it left or right when disassembling or re-assembling it.

4. Press the fixing hook of the rail system.

5. Holding the top of the Freezer Drawer, pull it out all the way, and then remove it from the rail system.

CAUTION
Be careful not to scratch or dent the sliding rail by letting it strike the floor.

CAUTION
Make sure that you mount the freezer basket in the right position when removing / installing the freezer door. Failing to do so may result in the door not opening or closing properly.
Putting too much food into the freezer drawers can prevent the freezer from closing completely and can cause frost build-up.

LEVELING THE REFRIGERATOR

Make sure the refrigerator is level so that you can make final adjustments. Use a level to test if the refrigerator is level both side to side and back to front. If the refrigerator is not level, you will not be able to get the doors perfectly even, which may cause moisture condensation and increased energy bills. Below is an example of how to level the refrigerator if the left side of the refrigerator is lower than the right side.

How to adjust the level

1. Open the freezer drawer and remove the lower basket.
2. Insert a flat-blade screwdriver (-) into a notch on the left control lever, and then turn it counterclockwise to level the refrigerator. (You turn the lever clockwise to lower the refrigerator and counterclockwise to raise it.)

   ![Control Lever](image)

Both control levers must be touching the floor to avoid possible personal injury or property damage because of tipping.

   ![CAUTION](image)

   If the right side is lower, perform the same procedure, but with the right control lever.

   ![CAUTION](image)

   It is difficult to remove the cover leg front from the refrigerator, so we do not recommend making small adjustments with the control lever. Instead, refer to the next page for the best way to make minor adjustments to the doors.

RE-ASSEMBLE THE FREEZER DRAWER

To reattach the drawer after you have moved the fridge to its final location, assemble the parts in reverse order.
MAKING MINOR ADJUSTMENTS BETWEEN DOORS

Remember, a leveled refrigerator is necessary for getting the doors perfectly even. If you need help, review the previous section on leveling the refrigerator.

The left door is fixed. To make minor adjustments between doors, adjust only the right door.

1. Pull out the freezer drawer (1) to reveal the lower hinge (2).

2. Insert a philips screwdriver (+) (3) into the shaft (4) of the lower hinge.

3. Adjust the height by turning a philips screwdriver (+) (3) clockwise (_DOWN_) or counterclockwise (UP_).

When you turn a philips screwdriver (+) counterclockwise ( ), the door will move up.

INSTALLING THE WATER DISPENSER LINE

A water dispenser with a filter is one of the helpful features on your new refrigerator. To help promote better health, the water filter removes unwanted particles from your water. However, it does not sterilize or destroy microorganisms. You may need to purchase a water purifying system to do that. In order for the ice maker to operate properly, a water pressure of 138 ~ 862 kPa is required. Under normal conditions, a 170 cc (5.75 oz.) cup can be filled in about 10 seconds. If the refrigerator is installed in an area with low water pressure (below 138 kPa), you can install a booster pump to compensate for the low pressure. After you have connected the water line, make sure the water storage tank inside the refrigerator is properly filled. To do this, press the water dispenser lever until the water runs from the water outlet.

Water line installation kits are included with the unit. You can find it in the freezer drawer.

The new hose-sets supplied with the appliance are to be used and that old hose-sets should not be reused.

### Parts for water line Installation

<table>
<thead>
<tr>
<th>Water line fixer and screws</th>
<th>Pipe connector</th>
</tr>
</thead>
<tbody>
<tr>
<td>Water line</td>
<td></td>
</tr>
</tbody>
</table>

English - 21
Connecting to the water supply line

1. First, shut off the main water supply line.
2. Locate the nearest cold, drinking water line.
3. Follow the Water line Installation Instructions in the installation kit.

**CAUTION**

The water line must be connected to the cold water pipe. If it is connected to the hot water pipe, it may cause the purifier to malfunction.

4. After connecting the water supply to the water filter, turn your main water supply back on and dispense about 3 L to clear and prime the water filter.

Connecting the water line to the refrigerator

1. Remove the cap from the water line on the unit and insert the compression nut of the water line into the water line on the unit.
2. Connect the water line on the unit with the water line in the kit.
3. Tighten the compression nut onto the compression fitting. There should be no gaps between (A, B & C).
4. Turn water on and check for any leakage.

**CAUTION**

Only connect the water line to a drinkable water source. If you have to repair or disassemble the water line, cut off 6.5 mm of the plastic tubing to make sure you get a snug, leak-free connection.

Before being used, the leakage in these places should be examined.

- Samsung Warranty does not cover WATER LINE INSTALLATION.
- It will be done at customer’s charge unless the retail price includes installation cost.
- Please contact Plumber or Authorized Installer for the installation if needed.
- If Water leakage occurs due to improper installation, Please contact installer.
COMPLETING THE SET UP

Now that you have your new refrigerator installed in place, you are ready to set up and enjoy the features and functions of the appliance. By completing the following steps, your refrigerator should be fully operational.

1. Make sure your refrigerator is in an appropriate location with reasonable clearance between it and the wall. Refer to installation instructions in this manual.
2. Once the refrigerator is plugged in, make sure the interior light comes on when you open the doors.
3. Set the Temperature control to the coldest temperature and wait for an hour. The freezer will get slightly chilled and the motor will run smoothly. Reset the refrigerator and freezer to the temperatures you want.
4. After you plug the refrigerator in, it will take a few hours to reach the appropriate temperature. You can store food and drinks in the refrigerator after the temperature is sufficiently cool.

If condensation or water drops appear on both sides of the fridge door’s central part, turn the Energy Saver mode off after removing the condensation. (See the explanation of the Energy Saver button in “Using the control panel” on page 25.)
Using the Control Panel

(1) Freezer / Power Freeze (3 sec)

The Freezer button serves two purposes:
- To set the Freezer to your desired temperature.
- To turn the Power Freeze function on and off.

1. To set the Freezer temperature, touch the Freezer button. You can set the temperature between 5 °F (-15 °C) and -8 °F (-23 °C).

2. Power Freeze function
Touch and hold this button for 3 seconds to decrease the time needed to freeze products in the Freezer. It can be helpful if you need to quickly freeze easily spoiled items or if the temperature in the freezer has warmed dramatically. (For example, if the door was left open.) When you use this function, the energy consumption of the refrigerator will increase. Remember to turn it off when you don’t need it and return the freezer to your original temperature setting. If you need to freeze a large amount of food, activate the Power Freeze function at least 24 hours before you put the food into the freezer.

(2) Alarm / Filter Reset (3 sec)

The Alarm button serves two purposes:
- To turn the door open alarm on and off
- To reset the water filter life indicator.

1. Door Alarm Function
If the door alarm is set to On, an alarm beeps if any refrigerator door is left open for more than three minutes. The beeping stops when you close the door. The door alarm function is pre-set to On in the factory. You can turn it off by pressing and then releasing the Alarm button. You can turn it back on in the same fashion. The icon lights up when the function is on. When the Door Alarm function is on and the alarm sound is triggered, the Door Alarm Icon will blink while the alarm sounds.

2. Water Filter Life Indicator Function
After you replace the water filter, touch and hold this button for 3 seconds to reset the water filter life indicator. When you reset the water filter life indicator, the Filter icon on the panel turns Off. The Filter icon will turn red to let you know it is time to change the water filter after six months (about 300 gallons). Some areas have large amounts of lime in their water, which causes the water filter to clog more quickly. If this is the case in your area, you will have to change the filter more frequently than every six months.
Energy Saver

Touching this button turns Energy Saver mode on and off. When you turn Energy Saver on, the Energy Saver icon lights. Turn Energy Saver off and the icon goes off. The Energy Saver function automatically turns on when power is supplied to the refrigerator. If condensation or water drops appear on the doors, turn the Energy Saver mode off.

Fridge / Power Cool (3 sec)

The Fridge button serves two purposes:
- To set the Fridge to your desired temperature.
- To turn the Power Cool function on and off.

1. To set the Fridge temperature, press the Fridge button. You can set the temperature between 44 °F (7 °C) and 34 °F (1 °C).

2. Power Cool function
Touch and hold this button for 3 seconds to decrease the time needed to cool products in the Refrigerator. It can be helpful if you need to quickly cool easily spoiled items or if the temperature in the fridge has warmed dramatically.
(for example, if the door was left open)

Lighting / °C↔°F (3 sec)

The Lighting button serves two purposes:
- To turn the dispenser light on and off
- To switch the temperature units between °C and °F.

1. Light Function
Touching the Lighting button turns on the Dispenser LED lamp in continuous mode so that it stays on continuously. The button also lights up. If you want the Dispenser lamp to come on only when someone uses the dispenser, press the Lighting button to turn the continuous mode off.

2. To switch the temperature units between °C and °F.
Touch and hold this button for 3 seconds to select the temperature display you want. Each time you press and hold the button, the °C and °F temperature modes alternate and the °C or °F icon lights up, indicating your selection.

Ice Maker Off

If you don’t want to make more ice, touch the Ice Maker Off button. The icon will light up and the Ice-Maker stops making ice.

We recommend you to stop ice making if the following occur:
- There is enough ice in the ice bucket.
- You want to save water and energy.
- Water is not being supplied to the refrigerator.

If the ice maker function is ON, and the water line is not connected, there will be a water valve noise from the back of the unit. Press the Ice Maker Off (Control Lock (3 sec)) button for less than 3 seconds until the Ice Off Indicator ( ) illuminates.
(7) Water

Touch this button to dispense water. This mode can not be used with the Ice Type mode simultaneously. Water mode shuts off when you touch the Cubed / Crushed Ice button.

To save electricity, the Panel Display turns off automatically under the following conditions:
When no button has been pressed, when no doors are open, or when no Dispenser Lever has been pushed.
However, the icon indicating your cubed or crushed ice selection, will stay on.
When you press a button, open a door, or push a Dispenser Lever, the Panel Display will turn on again.
Except for the Energy Saver, Water, and Cubed / Crushed Ice buttons, all function buttons will become operational after you remove your finger from the button you are currently pressing.

(8) Filter

Water filter usage
This icon lights up when you need to change the filter, usually after the refrigerator has dispensed about 300 gallons of water (after about 6 months). The icon will blink red for several seconds when you open or close the door.
After you install the new water filter, reset the filter indicator by touching and holding the Hold 3sec for Filter Reset button for 3 seconds.
- If water is not dispensing or dispensing slowly, you need to replace the water filter because the water filter is clogged.
- Some areas have large amounts of lime in their water, which causes the water filter to clog more quickly.

(9) Ice Type

Touch this button to select your desired ice type. Cubed and crushed ice modes alternate when you press the button.
This mode can not be used with the Water mode simultaneously.

(10) Ice Maker Off / Control Lock (3 sec)

The Ice Maker Off button serves two purposes:
- To turn the Ice maker on and off
- To turn the Control Lock Function on and off.

1. Ice Off Function
If you don’t want to make more ice, press the Ice Maker Off button.

2. Control Lock Function
Touch and hold this button for 3 seconds to lock the display and the dispenser buttons so the buttons can not be used.
When Control Lock is on, the refrigerator does not dispense ice or water, even if the Dispenser Lever is pressed.
The Control Lock icon lights up to indicate you’ve activated the Control Lock function. Press 3 seconds to unlock.

Cooling Off Mode

Cooling Off mode (also called Shop mode), is designed for use by retailers when they are displaying refrigerators on the shop floor.
In Cooling Off mode, the refrigerator’s fan motor and lights work normally, but the compressors do not run, and the refrigerator and freezer do not get cold.
To start Cooling Off mode, touch and hold the Freezer, Fridge and Alarm buttons for 5 seconds during normal operation.
The refrigerator chime sounds and the temperature display flashes OFF.
To cancel Cooling Off mode, touch and hold the Freezer, Fridge and Alarm buttons again for 5 seconds.
CHANGING THE WATER FILTER

To reduce risk of water damage to your property DO NOT use generic brands of water filters in your SAMSUNG Refrigerator.

USE ONLY SAMSUNG BRAND WATER FILTERS. SAMSUNG is not legally responsible for any damage, including, but not limited to, property damage caused by water leakage from the use of a generic water filter.

SAMSUNG Refrigerators are designed to work ONLY WITH SAMSUNG Water Filters. The Filter light turns red to let you know when it is time to change your water filter cartridge. To give you time to get a new filter, the red light comes on just before the capacity of the current filter runs out. Changing the filter on time provides you with the freshest, cleanest water from your refrigerator.

1. Shut off the water supply. Then, turn the water filter (1) about 1/4 turn, counter-clockwise.

2. Pull the water filter (1) from the case filter (2).

3. Insert the new filter into the filter case (4).

4. Push the filter, and then turn it clockwise until it locks.
   • If you have trouble inserting the water filter because of high water pressure, shut off the water supply valve.

5. Touch and hold the “Alarm / hold 3 sec for Filter Reset” button (Filter Reset) for about 3 seconds to reset the water filter indicator. The indicator's red light will turn off.

6. If you turned off the water supply, turn it back on.

• The locked symbol should be lined up with the indicator line.

For a replacement water filter, visit your local home Improvement center or visit Samsung’s parts distributor on line at: http://www.samsungparts.com
Be sure the replacement water filter has the SAMSUNG logo on the box and on the water filter.
Removing any residual matter inside the water supply line after installing the water filter.

1. Turn ON the water supply if you turned it off when you installed the water filter.

2. Run water through the dispenser until the water runs clear (approx. 6 to 7 minutes). This will clean the water supply system and remove air from the lines.

3. Additional flushing may be required in some households.

4. Open the Refrigerator door and make sure there are no water leaks coming from the water filter.

   ![Dispenser Not Working Icon]

   Be sure to flush the dispenser thoroughly, otherwise water may drip from the dispenser. This means that there is still air in the line.

---

Reverse Osmosis Water Supply

**IMPORTANT:**

The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 35 and 120 psi. (241 and 827 kPa).

If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi. (276 to 414 kPa)

If the water pressure to the reverse osmosis system is less than 40 to 60 psi (276 to 414 kPa):

- Check if the sediment filter in the reverse osmosis system is blocked. Replace the filter if necessary.
- Allow the storage tank on the reverse osmosis system to refill after heavy usage.
- If your refrigerator has a water filter, it may further reduce the water pressure when used in conjunction with a reverse osmosis system. Remove the water filter.

If you have questions about your water pressure, call a licensed, qualified plumber.
CONTROLLING THE TEMPERATURE

Basic temperature of Freezer and fridge compartments

The basic and recommended temperatures of the Freezer and Fridge compartments are 0 °F and 37 °F (or -18 °C and 3 °C) respectively. If the temperature of the Freezer and Fridge compartments are too high or low, adjust the temperature manually.

Controlling the Freezer temperature

The Freezer temperature can be set between -8 °F and 5 °F (or between -23 °C and -15 °C) to suit your particular needs. Press the Freezer button repeatedly until the desired temperature is shown in the temperature display. The temperature will change by 1 °F (or 1 °C) with each press. See below.

Fahrenheit: 0 °F → -1 °F → -2 °F → -3 °F → -4 °F → -5 °F → -6 °F → -7 °F → -8 °F → 5 °F → 4 °F → 3 °F → 2 °F → 1 °F → 0 °F.

Centigrade: -18 °C → -19 °C → -20 °C → -21 °C → -22 °C → -23 °C → -15 °C → -16 °C → -17 °C → -18 °C.

Keep in mind that foods such as ice cream may/melt at 4 °F (or -15.5 °C). The temperature display will move sequentially from -8 °F to 5 °F (or from -23 °C to -15 °C).

Controlling the fridge temperature

The fridge temperature can be set between 34 °F and 44 °F (or between 1 °C and 7 °C) to suit your particular needs. Press the Fridge button repeatedly until the desired temperature is shown in the temperature display. The temperature will change by 1 °F (or 1 °C) with each press. See below.

Fahrenheit: 37 °F → 36 °F → 35 °F → 34 °F → 44 °F → 43 °F → 42 °F → 41 °F → 40 °F → 39 °F → 38 °F → 37 °F.

Centigrade: 3 °C → 2 °C → 1 °C → 7 °C → 6 °C → 5 °C → 4 °C → 3 °C.

The temperature control process for the Fridge works just like the Freezer process. Press the Fridge button to set your desired temperature. After a few seconds, the Fridge will begin adjusting towards the newly set temperature. This will be reflected in the digital display.
• The temperature of the Freezer or Fridge may rise when you open the doors too frequently, or if a large amount of warm or hot food is placed inside.

• A rise in temperature may cause the digital display to blink. Once the Freezer and Fridge temperature return to their normal set temperatures, the blinking will stop.

• If the blinking continues, you may need to “reset” the Refrigerator. Try unplugging the appliance, wait for around 10 minutes and then plug the power cord back in.

• If there is a communication error between the Display and Main Controller, the Convertible Display light may blink. If the blinking continues for a long period of time, please contact a Samsung Electronics Service Center.

Using the ice Dispenser

Place a glass underneath the ice dispenser and push gently against the dispenser lever with your glass. Make sure the glass is in line with the dispenser to prevent the ice from bouncing out.

• To select water, press the water button on the display, and then press the dispenser lever.

• To select Ice, press the ICE type button of your choice on the display, and then press the dispenser lever.

• If you have selected cubed ice, when you press the lever, the dispenser may dispense a small amount of crushed ice first.

• If ice doesn’t come out, pull out the ice bucket and press the test button located on the right side of ice maker.

• Do not press the test button continuously when the tray is filled with ice or water. Water may overflow or ice may jam the bucket.

• When you press the Test button, you will hear the refrigerator chime (ding-dong). When the chime sounds, release the Test button.

• The chime sounds automatically again to let you know the ice maker is working well.

• Replace the ice bucket.

USING THE COLD WATER DISPENSER

Push the appropriate ice type button to select what you want dispensed.

<table>
<thead>
<tr>
<th>Water</th>
<th>Cubed</th>
<th>Crushed</th>
<th>Ice Maker Off</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

NO ICE
Select this if you want to turn ice maker off

Check the water level

Test button
Ice Making

To fill the ice bucket to maximum capacity after installation, follow these steps:

1. Allow your refrigerator to operate and cool down for 24 hours (or 1 full day).
   - Waiting 24 hours will allow your ice maker to cool properly.
2. Dispense 4 to 6 ice cubes into a glass.
3. After 8, and then 16 hours, dispense a full glass of ice.

- To clean the ice bin/bucket, wash with a mild detergent, rinse well, and then dry it thoroughly.
  Do not use harsh or abrasive cleaners or solvents.
- When you select Cubed Ice after using the Crushed Ice mode, a small amount of residual crushed ice might be produced.

If There is a Power Failure

If a power failure occurs, ice cubes may melt, and then freeze together when the power comes back on, preventing the dispenser from working properly.
To prevent this problem, after a power failure, pull out the ice bucket and discard the residual ice or water.
After you dump the ice from the ice bucket, you should press the dispenser lever once with the “Water” or “Ice Type” function ON.
The ice maker will make new ice faster after you return the ice bucket to the refrigerator.

If you use all the ice at once, you must repeat Steps 2 and 3 under Ice Making. However, only wait 8 hours before dispensing the first 4 to 6 ice cubes. This will replenish the ice cubes and ensure maximum ice production.

Using the ice off Function

When you select the Ice Off mode, remove all ice cubes from the bucket.
If you leave the ice cubes in the bucket, the ice cubes may clump together, making it difficult to remove them.
To remove the ice bucket safely and avoid injury, hold the bottom of the bucket with one hand and the side of the bucket with the other.
Then, lift up on the ice bucket, and pull it straight out.
To put the ice bucket back in, push it firmly straight back.

If the ice bucket is not pushed firmly into place, ice in the bucket can melt.

If the bucket does not fit, turn the helix 90 degree (see the last illustration on the right, below) and try again.

- Use only the ice maker provided with the refrigerator.
The water supply to this refrigerator must only be installed/connected by a suitably qualified person.
  Connect to a potable water supply only.
- To operate the ice maker properly, water pressure of 20 ~ 125 psi is required.
Going on vacation...

If you are going on a long vacation or business trip and won’t use the water or ice dispensers for a long time:

- Close the water valve. Otherwise, water leakage may occur.
- Remove all food and ice in the ice bucket.
- Unplug the refrigerator.
- Wipe excess moisture from inside and leave the doors open. Otherwise, odor and mold may develop.

Ice Maker Do’s and Don’ts

- Do not put your fingers, hands or any other unsuitable objects in the chute or ice-maker bucket.
  - It may result in personal injury or material damage.
- Never put your finger or any other objects in the dispenser opening.
  - It may cause injury.
- Do not try to disassemble the ice maker.
- Do not wash or spray the ice bucket with water while it is in the refrigerator. Remove it to clean it.

When you insert the Ice maker tray, be sure that the tray is well centered at the entrance. Otherwise, the tray may get stuck.

Water clouding phenomenon

All water provided to the refrigerator flows through the core filter which is an alkaline water filter. In the filtering process, the pressure of the water that has flowed out of the filter is increased, and the water becomes saturated with oxygen and nitrogen. When this water flows out into the air, the pressure plummets and the oxygen and nitrogen get supersaturated, which results in gas bubbles. The water may temporarily look misty or cloudy due to these oxygen bubbles. After a few seconds, the water will look clear.

Please wait 1 second before removing the cup after dispensing water to prevent spills. Do not pull out the lever dispenser after dispensing ice or water. It comes back automatically. Ice is made in cubes. When you select “Crushed”, the ice maker grinds the ice cubes into crushed ice.
When closing the door, make sure the Vertical Hinged Section is in the correct position to avoid scratching the other door. If the Vertical Hinged Section is reversed, put it back to the right position and close the door. Moisture may appear at times on the Vertical Hinged Section. The door handle may become loose over time. If this happens, tighten the bolts found on the inside of the door. If you close one door with too much force, the other door may open.

When the door opens, the interlock switch automatically turns off the auger motor in the ice maker for safety reasons.

When the interior or exterior LED lamp has gone out, please contact Samsung Customer Support.
USING THE COOL SELECT PANTRY™

The Cool Select Pantry™ is a full-width drawer with adjustable temperature control. This pantry can be used for large party trays, deli items, pizza, beverages, or miscellaneous items. There is a temperature control which can adjust the amount of cold air allowed into the pantry. The control is located on the right side of the pantry.

• The Pantry has three modes: The Fresh mode, Chilled mode, and Deli mode. Fresh mode is the default. Press the Temp button repeatedly until the mode you want is lit. Once you select a mode, the temperature will change to match the mode you selected.

• The Pantry temperature may change depending on the number of items inside and where they are located, the ambient temperature, and how often the door is opened.

The Pantry Selection Button

1. When you select “Deli”, the temperature of the pantry will be kept around 41 °F (or 5 °C). This feature helps keep food fresh for a long time.
2. When you select “Fresh”, the temperature of the pantry will be kept around 38 °F (or 3 °C). This feature helps keep food fresh for a longer time.
3. When you select “Chilled”, the temperature of the pantry will be kept around 34 °F (or 1 °C). This feature also helps keep meat or fish fresh for a longer time.

The table below lists the Pantry modes and the kinds of foods that can be stored safely for each mode.

<table>
<thead>
<tr>
<th>Deli</th>
<th>Fresh</th>
<th>Chilled</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pineapple</td>
<td>cucumbers</td>
<td>steaks</td>
</tr>
<tr>
<td>lemon</td>
<td>apples</td>
<td>hard cheeses</td>
</tr>
<tr>
<td>avocado</td>
<td>oranges</td>
<td>cold cuts</td>
</tr>
<tr>

<td>grapes</td>
<td>bacon</td>
</tr>
<tr>
<td>zucchinis</td>
<td></td>
<td>hot dogs</td>
</tr>
<tr>
<td>corn</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Fruits and vegetables may be damaged if you set the Pantry to the Chilled mode. Do not store lettuce or other leafy produce in this pantry.

Do not store glass bottles in the Cool Select Pantry. If they are freeze, they can break and cause personal injury.

CAUTION
REMOVING THE REFRIGERATOR ACCESSORIES

1. Door Bins
- Door Bins (1)
  - To remove: Simply lift the bin up and pull straight out.
  - To relocate: Slide it in above the desired location and push down until it stops.
- Door Bins (2)
  - To remove: Take the right side of the bin out by lifting it at an angle along the guide, and then take the left side out by pulling it from the door.
  - To relocate: Slide it into the original location and push down until it sticks.

Injury may occur if the door bins are not firmly assembled.
Do not allow children to play with the bins.
Sharp corners of the bins may cause injury.

Do not adjust a bin full of food.
Remove the food first.
To remove dust from the bins: Remove the guard and wash the bin in water.

2. Tempered Glass shelves
- To remove: Tilt up the front of the shelf in the direction shown (1) and lift it up vertically (2). Pull the shelf out.
- To relocate: Tilt the front of the shelf up and guide the shelf hooks into the slots at a desired height. Then lower the front of the shelf so that the hooks can drop into the slots.

The Tempered Glass shelves are heavy.
Use special care when removing them.

After sliding the foldable shelf in and folding it, the Shelf Front can be removed for your convenience.
If you use the self without removing the Shelf Front, be aware the Shelf Front can separate from the shelf.

3. Vegetable & Fruit Drawers

Do not adjust a bin full of food.
Remove the food first.
To remove dust from the bins: Remove the guard and wash the bin in water.

- Door Bins
Before removing the drawer, please remove door bins first as below.
4. Cool Select Pantry PLUS
- **To remove the pantry**: Pull the pantry out to full extension. Tilt up the front side of the pantry and pull straight out.
- **To relocate the pantry**: Push the rails to the back of the refrigerator. Place the drawer onto the rails and slide the pantry back until it is in place.

- **To remove the divider**: Pull the pantry completely out to full extension and raise the front side of the divider to unhook it from the rear wall of the pantry, then lift the divider out.
- **To relocate the divider**: Hook the back of the divider over the rear wall of the pantry and push the divider down.

**Using the doors**

Ensure that the doors close all the way and are securely sealed.
When the refrigerator door is only partially open, it will automatically close.
But, the door will stay open when opened more than the auto close range and you must close it manually.
REMOVING THE FREEZER ACCESSORIES

1. Freezer Room Guard
   - To remove: Remove the freezer room guard (1) by lifting the guard up.
   - To relocate: Push down until the guard (1) locks into place.

2. Ice Bucket
   - To remove: Lift the ice bucket (1).
   - To relocate: Place the ice bucket into the Super extended drawer (2).

3. Super Extended Drawer
   - To remove: Pull the drawer out to full extension. Tilt up the rear of the drawer and lift straight out.
   - To relocate: Place the drawer onto the rails (4) by tilting it up. Lower the drawer into place until it is horizontal and slide the drawer (3) in.

4. Freezer Drawer
   - To remove the freezer drawer: Pull the freezer drawer out fully. Tilt up the rear of the bin and lift it out to remove.
   - To relocate the freezer drawer: Place the bin into the rail assembly.

CAUTION
- You can scratch the side of the bin if you twist it left or right when disassembling or re-assembling it.

CAUTION
- Do not allow babies or children to climb into the freezer drawer. They could damage the refrigerator and seriously injure themselves. Do not sit on the freezer door. The door may break.

CAUTION
- Do not remove the divider.

WARNING
- If trapped inside, children may be injured or suffocate to death.

CAUTION
- Do not allow babies or children to climb into the freezer drawer. They could damage the refrigerator and seriously injure themselves. Do not sit on the freezer door. The door may break.

CAUTION
- Do not remove the divider.

WARNING
- If trapped inside, children may be injured or suffocate to death.
CLEANING THE REFRIGERATOR

Caring for your Samsung French Door Refrigerator prolongs the life of your appliance and helps keep the refrigerator free of odor and germs.

Cleaning the Interior

Clean the inside walls and accessories with a mild detergent and then wipe dry with a soft cloth. You can remove the drawers and shelves for a more thorough cleaning. Just make sure to dry drawers and shelves before putting them back into place.

Cleaning the Exterior

Wipe the control panel and digital display with a damp, clean, soft cloth. Do not spray water directly on the surface of the refrigerator. The doors, handles, and cabinet surfaces should be cleaned with a mild detergent and then wiped dry with a soft cloth. To keep your appliance looking its best, polish the exterior once or twice a year.

CAUTION
Do not use benzene, thinner, or Clorox for cleaning. They may damage the surface of the appliance and may cause a fire.

You can erase the printed letters on the display if you apply stainless cleaner directly to the area where the letters are printed.

Cleaning the Ice / Water Dispenser

Wipe the Ice / Water Dispenser with a clean and soft cloth.

As you use the dispenser’s crushed ice selection, some residual ice chips may start to collect in the ice chute. To prevent that residual ice from melting and running out of the chute, you should clean out the residual ice when you see it start to collect in the ice chute.

Do not spray water directly on the refrigerator. Use a clean, damp cloth to clean.
Cleaning the Rubber door seals
If the rubber door seals are dirty, the doors may not close properly, and the refrigerator will not operate efficiently.
Keep the door seals free of dust or stains by cleaning the doors with a mild detergent and damp cloth.
Wipe dry with a clean, soft cloth.

Do not clean the refrigerator with benzene, thinner, or car detergent. These substances could cause a fire.

Cleaning the rear side of the refrigerator
To keep cords and exposed parts free of dust and dirt accumulation, vacuum the rear side of the appliance once or twice a year.

Do not remove the back cover (1). You could suffer an electric shock.
# Troubleshooting

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
</table>
| The refrigerator does not work at all or it does not chill sufficiently. | • Check if the power plug is properly connected.  
• Check if the set temperature on the digital display is warmer than the freezer or fridge inner temperature. If it is, set the freezer or fridge to a colder temperature.  
• Is the refrigerator in direct sunlight or located near a heat source? If so, it may not be able to cool sufficiently. Install it in a location that is out of direct sunlight and not near a heat source.  
• Is the back of the refrigerator too close to the wall, preventing proper ventilation? If so, it may not be able to cool sufficiently. Keep it an appropriate distance from the wall.  
• Is there too much food inside so that the food is blocking the outlet vent? To keep the refrigerator at a suitable temperature, do not fill the refrigerator with too much food. |
| The food in the fridge is frozen. | • Check if the set temperature on the digital display is too low. If so, raise the set temperature inside the refrigerator.  
• Is the temperature in the room too low? Set the refrigerator warmer.  
• Did you store food with a high moisture content in the coldest part of the refrigerator or near the cooling outlet vent? Try moving those items to the other shelves in the fridge instead of keeping them in the colder areas or bins. |
| You hear unusual noise or sounds. | • Check if the refrigerator is level and stable.  
• Is the back of the refrigerator too close to the wall, preventing proper ventilation?  
• Was anything dropped behind or under the refrigerator?  
• If you hear a “ticking” sound from inside the refrigerator, this is normal. It occurs because various parts contract or expand in response to temperature changes in the refrigerator interior.  
• If it sounds as if something is hitting something else inside the refrigerator, this is normal. The sound is caused by the compressor operating at high capacity. |
| The cabinet-door sealing area of the appliance is hot and condensation is occurring. | • Some heat is normal as anti-condensators are installed in the vertical hinged section of the refrigerator to prevent condensation.  
• Is the refrigerator door ajar? Condensation can occur when you leave the door open for a long time. |
| The ice Maker is not producing ice. | • It may take longer to make ice if it is not sufficiently cool, such as when first installed.  
• Is the water line connected and the shut-off valve opened?  
• Did you manually stop the ice making function?  
• Check if the filter is properly installed. If it is not properly installed, the ice making function may not work. |
| You can hear water bubbling in the refrigerator. | • This is normal. The bubbling comes from refrigerant circulating through the refrigerator. |
| There is a bad smell in the refrigerator. | • Check for spoiled food.  
• Foods with strong odors (for example, fish) should be tightly covered.  
• Clean out the freezer periodically and throw away any spoiled food. When cleaning the inside of the fridge, store food elsewhere and unplug the appliance. Wipe with a dry dishcloth after 2-3 hours and then circulate air inside the refrigerator. |
<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
</table>
| Frost forms on the walls of the freezer.                               | • Is the air vent blocked?  
Removable any obstructions so air can circulate freely.  
• Allow sufficient space between the stored foods for efficient air circulation.  
• Is the freezer drawer closed properly?  
If the freezer drawer is not completely closed or is blocked, humidity from outside may enter and cause severe frost to form. |
| The water dispenser is not functioning.                                | • Is the water line connected and the shut-off valve opened?  
• Has the water supply line tubing been crushed or kinked?  
• Make sure the tubing is free and clear of any obstruction.  
• Is the water tank frozen because the fridge temperature is too low?  
Try selecting a warmer setting on the Digital display.  
• Is the Child Lock on?  
• Check if the filter is properly installed.  
If it is not properly installed, the water dispenser may not work. |
| The auto close system does not work with the freezer door.             | • Is there an imbalance between the right and left parts of the door?  
Open and close the door smoothly 1–2 times.  
After you do this, the auto close system usually works properly again.  
• Try opening the door smoothly to avoid unbalancing the right and the left part of the door. |
| Condensation or water drops form on vertical mullion and surroundings, etc. | • Condensation or water drops may form if the humidity is too high while the refrigerator is operating.  
• If condensation or water drops appears on vertical mullion and surroundings, etc., turn the Energy Saver mode off after removing the condensation.  
(See the explanation of the Energy Saver button in “Using the control panel” on page 25.) |
Memo
Ambient Room Temperature Limits
This refrigerator is designed to operate in ambient temperatures specified by its temperature class marked on the rating plate.

Internal temperatures may be affected by such factors as the location of the fridge/freezer, ambient temperature and the frequency with which you open the door. Adjust the temperature as required to compensate for these factors.

Correct Disposal of This Product
(Waste Electrical & Electronic Equipment)
(Applicable in countries with separate collection systems)
This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.
Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.
